

Using OHSAS 18001 (ISO45001) to Manage Occupational Health and Safety Effectively

3 Day Training Course

SHEQ Centre of Excellence will hold a 3 day Health and Safety Management Training programme on November 12th, 13th and 14th.

*The programme will provide participants with the knowledge and tools required to implement and maintain a **Safety Management System** that will comply with the international **OHSAS 18001 Standard (and identify changes for new ISO45001 standard)**. It will also be a great help to those who want to improve their existing **Health and Safety Management System and Safety Statement**.*

The course will be held in Dublin.

Topics included on the programme:

- *Health and Safety Policy*
- *Hazard Identification, Risk Assessment & Risk Control*
- *Objectives, Targets and Plans*
- *Resources, Roles, Responsibility, Accountability and Authority*
- *Competence, Training & Awareness*
- *Communication, Participation and Consultation*
- *Operational Controls*
- *Control of Records using Appropriate Systems*
- *Emergency Preparedness and Response*
- *Monitoring & Measurement*
- *Incident Report and Investigation*
- *Nonconformity, Corrective Action and Preventive Action*
- *Internal Auditing*
- *Management Review*
- *Plans for Continual Improvement*

Benefits of Attending the Course:

The course will help organisations to Save Time and Money by providing example templates and practical examples which we have already used to help many organisations achieve ISO and OHSAS certifications, both nationally and internationally.

Cost per Participant: €695 Euros for all 3 days

SHEQ Centre of Excellence (Safety, Health, Environmental and Quality) is an international risk management consulting firm, focused on helping businesses solve the complex challenges and decisions facing their company today.

SHEQ Centre of Excellence consultants have helped many clients to achieve and maintain compliance in the areas of occupational health, safety, quality, food safety, environmental, and energy.

The consultants lecture at third level on various EHS courses and have worked themselves in industry for many years implementing and maintaining management systems for quality, food safety, health and safety, environmental and energy management.
